- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 19-39, drawn to virtual product placement using a virtual product source, classified in class 345, subclass 619.
 - II. Claims 40-44, drawn to selling placement of products in moving media by time slot, classified in class 705, subclass 14.
 - III. Claims 45-54, drawn to selling placement of products in moving media by producing different versions, classified in class 705, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II-III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because virtual product placement does not require the methods of selling the placement of products in moving media in order to perform the editing/manipulation of the media. The subcombinations have separate utility such as selling advertisements regardless of the method of product placement.
- 3. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the

particulars of the subcombination as claimed because selling product placement based on time slots does not require producing different versions based on geography or channels of distribution. The subcombination has separate utility such as providing targeted advertising based on demographics (geography) and primary channels of distribution which receive the attention of targeted customers.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-III, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
